Municipalities*

UV Angel Adapt™

UV ANGEL CLEAN AIR™ TECHNOLOGY

HELP PROTECT YOUR BUILDING OCCUPANTS WITH UV ANGEL

As governments manage occupied spaces in a new way, we must think critically about the design and safety of the buildings where we gather and work. Employees want to know they are returning to healthy environments. Leaders in government roles can play an important part in creating healthier buildings for visitors by adding UV Angel's pathogen control technology.

UV Angel's UV-C technology automatically treats air and surfaces for harmful pathogens – adding an extra layer of protection. [At UV Angel, our passion is your health.](#)

REDUCE THE RISK OF EXPOSURE

In concert with standard cleaning protocols, governments are mitigating the risk of exposure for occupants by incorporating UV Angel Clean Air™ technology into office buildings and occupied spaces.

Creating a Healthy Environment

- Tailor workspace layouts
- Enforce social distancing
- Add physical dividers
- Integrate ceiling mounted UV Angel Air systems
- Utilize UV Angel Adapt™ to monitor surface contamination levels
- Reduce the spread of infectious aerosols between people

Research has shown that reducing contamination in the air also **reduces viruses, fungi and bacteria on surfaces.**

The UV Angel Clean Air™ results showed laboratory **elimination rates** up to **99.99%**

AIR TECHNOLOGY

UV Angel Clean Air™ Series

UV Angel Air integrates into existing or new construction in-ceiling lighting to create a seamless and effective air treatment system.

How it Operates

The patented UV Angel Clean Air™ works by drawing contaminated air containing viruses, bacteria and fungi into a sealed UV-C chamber where they are quickly neutralized. Clean, treated air is then circulated back out into the room. The UV Angel Air recirculates a 100 sq. ft. room, four times every hour.

SURFACE TECHNOLOGY

UV Angel Adapt™ Series

Keyboards and computers are essential tools for any office space, but a sharing these spaces makes for high-touch, hazardous environments.

Reduce the risk of spreading viruses and bacteria with an intelligent, automated UV-C technology that safely and continuously detects and neutralizes surface contamination.

How it Operates

The moment a potential threat is detected on surfaces, the UV Angel Adapt neutralizes it at a cellular level, killing at rates greater than 99%. The platform is designed to operate hundreds of times throughout the day, providing a disruption-free workflow.

COMPLETE

A TOTAL APPROACH

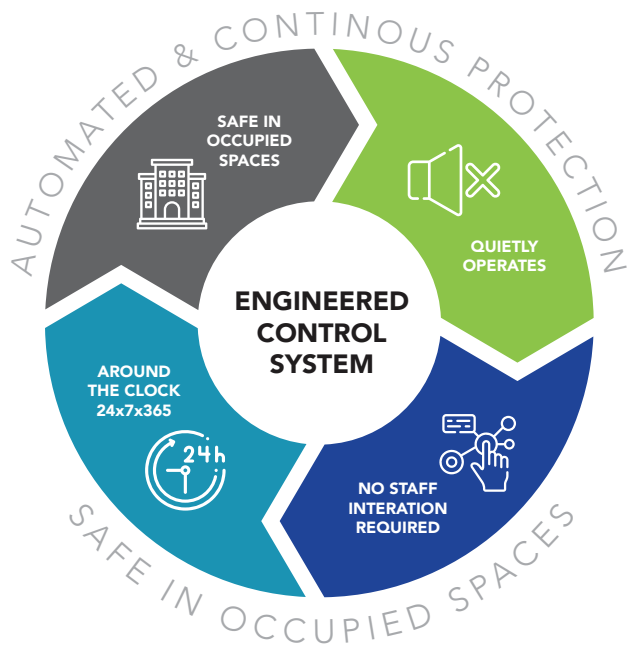

Installing the **UV Angel Air** and **Adapt Series** into government buildings can give employees and visitors the peace of mind they need to return with confidence.

Data-Driven Analytics - Powered by UV Angel Analytics

UV Angel Analytics puts powerful data into the hands of government officials. Our proprietary platform seamlessly communicates data to a cloud-powered web administration platform and delivers critical insights.

Features

- Lightweight, easy installation
- Multiple mounting options
- Energy efficient
- 0-10V dimming
- 120-277V
- ETL listed
