

HyBase Surgical Tables

During surgery, a good operating table is the cornerstone of success. Engineered for increasingly complex surgical scenes, Mindray operating tables needs the least effort and time to position the patient in a safe, comfortable and efficient way, providing different solutions according to the clinical requirement and hospital's budget.

HyBase V9

With a maximum capacity of 570 kg and up to 275 kg all-position overall load, HyBase V9 can accommodate overweight patients with extra stability. The new feature, MegaSlide, is able to extend the longitudinal shift up to 480 mm, allowing for broader image access to C-arm and better radiolucent image quality with the carbon fibre tabletop. Additionally, HyBase V9 offers simultaneous movements to increase positioning efficiency and reduce patient sliding.

Features:

- 20 electric movements, such as powered body elevator, Electric Leg plates adjustable individually, adapting to various surgical needs
- Colour-coded indication technology to give a timely warning when it comes to big degrees of Trendelenburg and reverse Trendelenburg positions
- Bluetooth hand control for unobstructed control in operating rooms. Triple-layer decompression pad to redistribute the patient's weight

HyBase V8

The modular design of the tabletop is tailored for various surgical disciplines, which can lower the cost for hospitals as they only need to buy the specific module, instead of a new table, for an additional surgical type.

Features:

- An extreme load capacity of up to 460 kg
- The longitudinal shift of up to 350 mm, free access to C-arm
- 595 mm lowest table position for neurosurgery, 1,095 mm highest table position for orthopedics
- Intelligent Collision Protection System to stop the table movement before collision occurs

HyBase 6100

Designed with a much lower table height of 498 mm specially for neurosurgery and minimally invasive surgery, a more user-friendly base cover, as well as a more convenient wireless remote-control system. Moreover, with longitudinal slide up to 320 mm, the table is ideally suitable for cardiovascular surgery or spinal surgery with C-arm.

Features:

- Longitudinal slide up to 320 mm for free access to C-arm
- Max. lifting capacity up to 380 kg with highest safety and stability
- Max overall load 360 kg in normal position
- Multi-layer decompression pad with waterproof and seamless design
- 498 mm lowest table position for Neurosurgery and Minimally Invasive Surgery
