

Introducing Monto.

monto

Monto makes sit-to-stand working possible at any desk, anywhere. It's portable and can be retrofitted to established workstations.

Used in conjunction with a CBS dynamic monitor arm or laptop support, Monto effortlessly transforms any fixed desk into a height adjustable workstation for standing or seated working.

MAKE LIGHT WORK OF INSTALLATION

The only tools needed to install Monto? One pair of hands. And because Monto is by far the lightest in its category, it can be moved effortlessly from one workstation to another. When it's not in use, Monto's thin profile means it can be stacked neatly under a desk or in a cupboard to maximise precious storage space.

MAKE SPACE - MAKE SENSE

Monto provides a stable support deck no matter the technology. If you're using a monitor, this is attached independently to the desk so that your typing, writing or sketching doesn't transfer distracting vibration to the display. Designed to optimise desk space, Monto keeps the surrounding area clear for a laptop, documents, lights and other workstation essentials, and with integrated cable management clips included as standard, Monto helps keep even the busiest of

desks neat and tidy. Workstations already equipped with Flo or Ollin monitor arms can easily be upgraded to Monto sit-to-stand functionality, with only the addition of an extended-height desk clamp to enhance the monitor's height range.

TAKE A STAND FOR ERGONOMICS

Effortless adjustment with a spring-assisted lift mechanism encourages easy posture change from sitting to standing throughout the working day. Monto's unique straight-up-and-down lift with nine working positions from 2.5cm to 43cm enables easier use and adjustment compared with all other sit-to-stand risers on the market. When fully lowered, Monto offers the lowest height profile and usable working area of any desktop riser. This means minimum impact on sit-height working and ensures healthy wrist positioning.

Monto is height adjustment made easy. Its spring-assisted mechanism has gravity-lock latches for smooth movement when it's correctly positioned on its feet. With durable cast aluminium legs and a non-slip anti-scratch base, Monto is built well and built to last. Its five-year warranty is just the start.

EFFORTLESSLY TRANSFORMS ANY FIXED DESK INTO A HEIGHT ADJUSTABLE WORKSTATION

EASY TO ADJUST

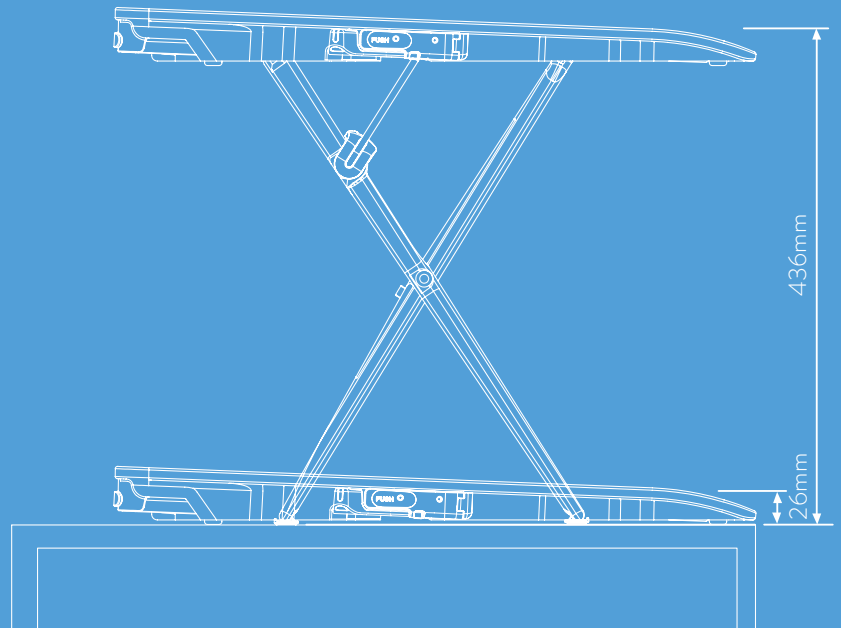

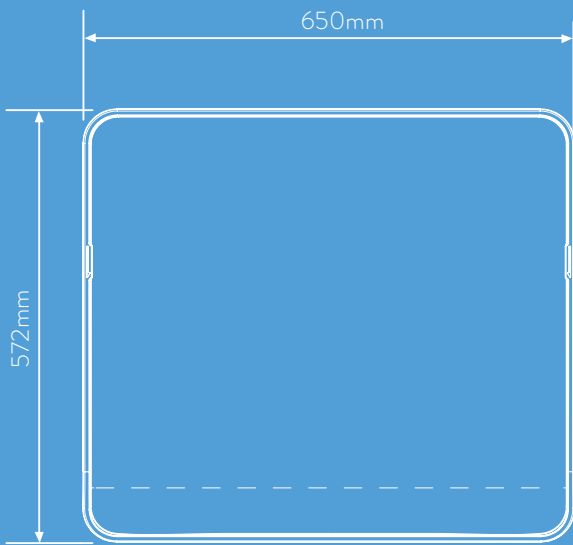

ERGONOMIC EXCELLENCE

LIGHTWEIGHT & EASY TO CARRY

CAN BE USED IN CONJUNCTION WITH A LAPTOP SUPPORT OR CBS DYNAMIC MONITOR ARM

OVERVIEW
